DENTAL

About Us

Founded in 2017, but with over 20 years in the dental industry, AORTA Australia delivers professional education and training both online and in person, with a passion for aesthetic orthodontics and clear aligner systems.

Alongside this, we have developed AORTA Laboratory to better support our members and local dental community with quality, affordable appliances and products.

AORTA's goals are to inspire and educate dentists and dental teams to the power of clear aligners and virtual smile creation.

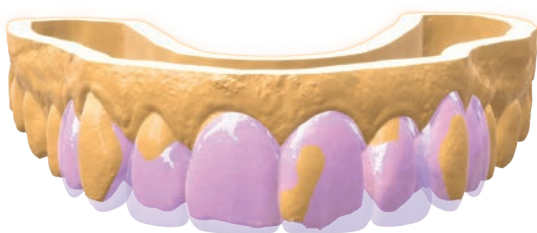

Our purpose is to unleash the power of clear aligners and a virtual smile creation workflow to the day to day dentist.

Locally Made

AORTA Laboratory is based in inner city Melbourne.

We are proud to be a flexible and agile dental laboratory that offers competitive, quality products. Striving to continuously improve our systems, services and available technologies, we are passionate about delivering the best products and services available to us.

As we are a small team, we love to engage with our customers in a personal manner to ensure you are being looked after.

Digital Workflow

We are completely digital! We accept all major scanner brands, or you can directly send your .stl files and a lab form to our friendly team.

All files received are securely stored online on the cloud, and all of our 3D printing is completed and stored on-site.

Free Delivery

All lab fees includes registered delivery via TNT, requiring a signature. Metropolitan areas can expect overnight delivery, while rural areas may expect an additional 1-2 days.

24HR Rush Service

Melbourne customers who find themselves needing same day or 24hr labwork, can enquire about our rush service! See details on our lab sheet.

Excludes prosthodontic & orthodontic cases.

Innovative Aligner Solutions

In-House Aligners / DIY Aligners

White labelled under your practice brand, our DIY aligners are a great alternative to achieve anterior correction with clear aligners.

Suitable for up to 10 anterior teeth movements and moderate rotations. Receive a digital diagnostic and treatment simulation. Includes IPR and attachment guide/ chart if required.

Available in Express (10 sets) or; Platinum (10 sets + 1 Refinement of 10).

Packed in custom labelled satchell and box.

Active Retainers

Available per arch, maximum 3 aligners.

Maximum of 6° of rotation & root tipping; 0.6° translation & extrusion. Ideal for minor relapse cases, or for the finishing stages of treatments.

Retainers

Premium retainers in a single arch, a pair, or as a pack of 3.

Lingual Wires

Created from digital scans for greater accuracy and improved fit.

Splints - Milled or 3D Printed

Night Guards or post-restorative protective splints. Milled - Hard; or 3D printed - Hard/Soft.

Features & Benefits

Zendura Plastics

All of our retainer or aligner products are made with premium Zendura thermoforming material which boasts greater durability and resistance to staining and oral deformation.

Zendura™
Clear Aligner & Retainer Material

We use Zendura 0.76mm by default;
1mm and Zendura Flex available on request.

Powered By AORTA

We've continuously conduct our own data analyses of past cases to improve movement and rotation predictability, resulting in improved clinical outcomes with our active retainer and DIY aligner products.

Try our
white-labelled
in-house aligner
service!

DentalMonitoring

Remote monitoring technology which assists in detecting and alerting you to any oral health or treatment anomalies, including ill-fitting or damaged appliances.

AORTA is a DSO provider of DentalMonitoring and are able to offer our members exclusive offers on on-boarding and training; as well as :

- Optimised protocols and messaging
- Small order consumables
- Training
- Monitoring concierge services

Prosthodontics: Crown / Veneer Range

Using the latest technologies and materials available, we are proud to offer a variety of Melbourne-made crown and veneer options to meet all of your needs.

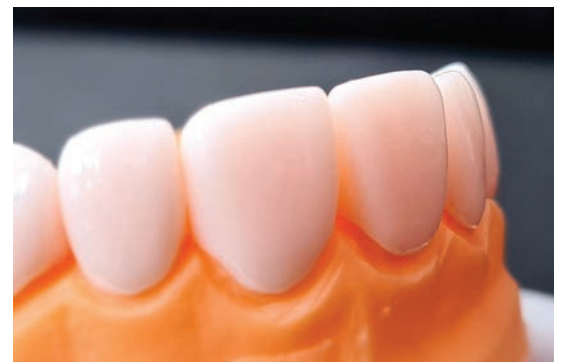

Artisan

Our artisan range of bespoke veneers are meticulously hand-crafted by our in-house specialist ceramist of over 30 years experience, to deliver exceptional quality and realism.

Premium

Pressed veneers capturing your choice of textures and translucencies. Full range of smile styles and shades available.

Generic

Our most affordable option, we offer milled e.Max with limited translucency and texture styles.

Premium Ivoclar Materials

All our ceramic products are made with Ivoclar IPS e.Max or ZirCAD products, for well known versatility, strength and aesthetic range.

Our in-house milling unit is the PrograMill PM7.

PRICING 2022

Delivery Cost is included in all services. All laboratory products are sent via registered courier TNT services.

Melbourne Metro 24HR Rush Service: (Excludes Prosthodontics / Platinum or Express Aligners)

+ 25% Surcharge on appliances required within 24 Hours from receipt of all materials (labform, photos, intraoral scans).

Same Day Appliance: Submitted by 11AM the same day.

Next Day Delivery 8AM-12PM: Submitted by 11AM the previous day. (Melb Metro Only)

Virtual Interdisciplinary Smile Simulator (3D)

Virtual Interdisciplinary Smile Simulator (VISS) is a 3D tool that can simulate post-clear aligner restorative solutions and demonstrate a predictive end result to the patient.

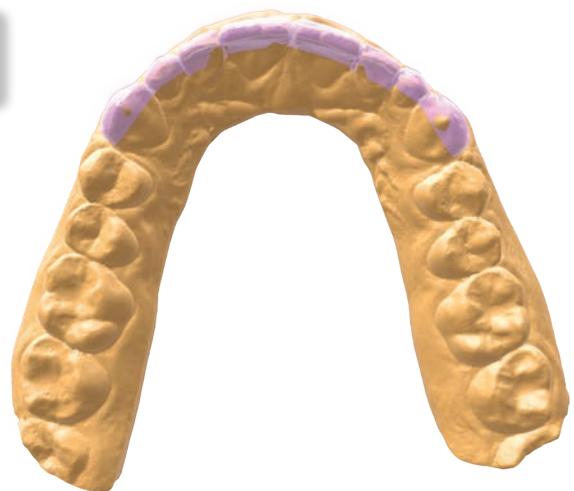

It can be used with any ortho aligner system. It is useful as an emotional marketing tool to improve case acceptance, as well as a guideline for the clinician during the restorative process.

Informed Visual Consent

Virtual Interdisciplinary Smile Simulator helps clinicians plan and enables patients to better engage with their treatment. VISS enables patients to create and see their smile digitally, before trialling their smile in-chair with our VISS Stent.

These digital smiles are created by our lab technicians here in Melbourne - helping patients to visualise their realistic smiles, build an emotional connection to their treatment and provide informed visual consent.

In this way, our Simulations are able to be shared quickly to your patients for feedback and changes - even before the mock-up process!

i) 3D Simulation & 3D Diagnostic

ii) Example Prep Guide

iii) Example Stent / Provisional

How to Order a VISS

1. Send Your Scans to Us!

Search for and connect to
'AORTA Laboratory'; 'AORTA Australia'
or; lab@aortaustralia.com.au

2. Upload Prescription & Photos

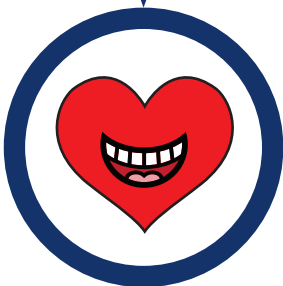

Submit your VISS Prescription Online!
Include notes, clear orthodontic photographs
& your patient's goals / wants.

www.aortaustralia.com.au/aorta--lab-form/

3. VISS Magic

Wait while your simulation is prepared by our technicians.
Your simulation link will be emailed to you / your practice
when it is ready.

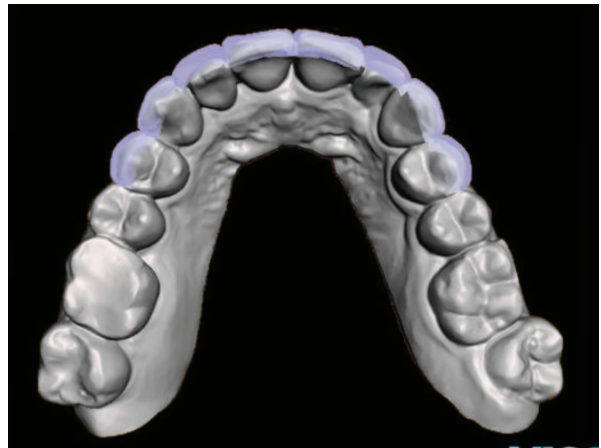

4. Show Your Patient

Show your patient their interactive, 3D smile simulation.
If your patient is happy, simply approve your simulation and
proceed to order your VISS Stent.

(includes Prep Guide + Provisional)

VISS Example Cases & 3D Simulations
